The arc-shaped design seamlessly reflects light in three directions with one light source, and the highly reflective fabric is suitable for strobes, LED lights, and natural sunlight. The interlocking curved tubes, metal rods, and screw knobs allow for tool-free assembly. Tubes and rods can slip through the reflector’s rod pockets and stretch it taut. The stand mount tilts at 90° for desired angles (stand NOT included). The reversible reflector with black and silver surfaces and the double-sided cover with gold and white colors can offer you four light effects for different photographic needs. 10705110	Neuromuscular Transmission Monitor General Nerve stimulator module for the measurement of neuromuscular transmission, via accelerometry. Provides an easy, accurate way to measure of patient muscle relaxation. Supports evidence-based judgment about the state of a patient’s neuromuscular blockade. The sensor is ergonomically designed for intuitive and optimal positioning throughout the monitoring period. Should be three-dimensional accelerometer sensor Adjustable stimulation current (at least 15 – 70 mA) Automatically switches off if not in used for a period. Operable on batteries or with AC power supply. Has audible messages feature Mounting clamp for medical stand or bedrail (at least 10-50mm) Clear screen display of information for immediate use. No sensor calibration required. Designed with simplicity and ergonomics in mind. Single button/control selection At least 3 plane accelerometer (hand sensor with cable) With capacity for extension cable at least 1.7 to 2.0 m With capacity for data transfer FOR SAFETY Compliant with European directive CEE 93/42 or equivalent	QCGH	No	PB	1st Quarter				GF	100,000.00	0.00	100,000.00	Ancilliary / Para-Medical Program
