These rodenticides provide good control without presenting any hazard to products of personnel. However, if the degree of infestation should ever warrant it, acute/chronic rodenticides must be used but only after close consultation with the client and then only under the strict supervision of the contractor. Supplementary control methods, such as use of mechanical traps and sticky board for rats, will also be employed if the situation so warrants. 2) Treatment for Cockroach Treatment by spraying or misting will be carried out specially in the harbourages and breeding places of cockroaches, such as pantries, toilets area and drainages. Cracks and crevices and hidden surfaces such as inside drawer units, cupboards and cabinets shall also be treated with insecticidal solution with residual effect, in which case all content thereof must be removed prior to the scheduled date of service. Where spraying or misting is inadvisable or forbidden, dusting or cockroach gel baiting will instead be done.	Lot	1	2,122,977.46	2,122,977.46
