50205010	ENGAGEMENT OF COURIER SERVICES FOR THE DELIVERY OF DOCUMENTS LINKED TO THE AUTOMATED DOCUMENT DELIVERY SYSTEM OF THE BUSINESS PERMITS AND LICENSING DEPARTMENT OF QUEZON CITY I. OBJECTIVE To ensure faster, efficient, timely and secure delivery of official documents and other printed matter to taxpayers, the Business Permits and Licensing Department (BPLD) needs to engage the services of a qualified and licensed courier service provider (provider). II. SCOPE OF SERVICES AND REQUIREMENTS 1. Pick-up of documents and other matters from the BPLD and delivery to the addressee, within one (1) to three (3) calendar days from the date of pick-up in a sealed envelope pouch or packet. The provider must guarantee an uninterrupted service, except for fortuitous events and acts of nature 2. In instances where the addressee/s cannot be located, or delivery is not effected at the first attempt for a reasons not due to the fault of the provider, the latter shall pursue the delivery up to three (3) more attempts provided that it shall immediately inform in writing the BPLD for further instructions. The BPLD may then modify delivery details to assist in the succeeding deliveries subject to protocols and existing policies of the BPLD. Should the three (3) succeeding delivery attempts remain unsuccessful, the documents and other matters shall be immediately declared as “undelivered”. As such, the provider shall return the undelivered documents and other matters to the BPLD within three (3) working days, stating the reasons and proof of non-delivery thereof. 3. Release of documents and other printed matter shall be made only to the business owner or to its authorized representative, and only upon presentation and verification by the provider of the authenticity of the identification card/s presented by the addressee or its authorized representative. The provider’s delivery riders or messengers shall be strictly prohibited from transacting with persons other than the addressee or its authorized representative for the timely and secure delivery of documents and other matters. 4. Submit certified weekly summary report supported by proof of deliveries ot other form of verification not later than three (3) working days after the end of every week. 5. Submit to the BPLD the Billing/Statement of Accounts every end of the month based on the actual number of deliveries made per month. 6. Provider shall ensure the protection of all documents and other matters received from loss, damage or destruction from the time of pick-up from the BPLD until the same are delivered to the intended addressee. In case the sealed envelope pouch or packet was lost, damaged or misdelivered, the provider shall immediately report the same to the BPLD within twenty-four (24) hours from the occurrence of loss, damage or 7. 50205030	SUPPLY AND DELIVERY OF INTERNET DATA SUBSCRIPTION FOR THE AUTOMATED AUDIT INSPECTION SYSTEM OF THE BUSINESS PERMITS AND LICENSING DEPARTMENT OF QUEZON CITY I. INTRODUCTION 'The Business Permits and Licensing Department (BLPD) of Quezon City is mandated to provide effective systems, procedures, and practices in the issuance and renewal of business permits, regulating the nature, conduct and/or operations of various business activities within the City. Part of its regulatory function is the monitoring of compliances of all business establishments with ancillary permits and clearances through the newly developed Automated Audit Inspection System (AIAS). Over the years, the BPLD, through its Inspection Division, manually conducts inspection and verification of all business establishments within the city. 'With the implementation of the audit inspection system, Inspectors and Verifiers will be able to conduct inspection efficiently and effectively, whether for compliance monitoring or an on-the-spot inspection. One of the major requirements of the AIAS that will be used by the Inspection Division is data subscription for the device that Inspectors and Verifiers will use for such purposes. II. OBJECTIVE 'Consistent with the automation of all systems and processes of the BLPD, the AIAS of the Inspection Division is designed to enhance the performance and effective delivery of the BPLD's mandated regulatory function. All License Inspectors shall be issued devices for their monitoring or inspection usage. Although the devices to be issued are wi-fi ready, availability of internet access especially during actual monitoring or inspections is necessary to ensure real time submission of reports. Mobile data shall be the secondary internet connection and will serve as a redundant connection to augment primary internet connection, especially in remote places where wi-fi is not available. III. PROJECT SCOPE OF WORK 1. The project covers the supply and delivery of one hundred fifteen (100) mobile data subscriptions. 2. Engagement of the service will be until December 31, 2024, which shall commence from the issuance of the Notice to Proceed and execution of the contract. 3. Monthly mobile data allocation must be for a maximum of 100 gigabytes (GB) only per subscriber identity module (SIM) card with a minimum internet connection speed of at least 20 megabits per second (Mbps). If the data cap of 100 GB is reached within a given billing period, the service shall be temporarily cut off until it is automatically replenished for the next billing period. Access to data shall be restored upon replenishment. 4. Dashboard for data usage shall be provided by the service provider for monitoring purposes of the subscriber. 5. Service provider shall replace any and all defective, lost, or damaged SIM cards immediately after receipt of written notification by the BLPD. 10901020	Bentley OpenRoads Designer (Roadway Design Software) - is a comprehensive and fully functioned detailed design application for surveying, drainage, subsurface utilities, and roadway design that supersedes all capabilities previously delivered through InRoads, GEOPAK, MX, and PowerCivil. It is an extremely versatile civil design application that is used for all types and sizes of civil projects around the world. The application addresses a wide variety of complex tasks such as interchange design, roundabout design, earthworks, surveying, sanitary and stormwater network design, subsurface utilities, and production of construction staking reports. It provides the workflows and toolsets to help you rapidly model design intent, ensure standards, work in all disciplines, and continuously model as you design your project. 10901020	Bentley OpenFlows SewerGems (Urban Sanitary And Combined Sewer Modeling Software) - enables you to produce optimal urban sewer planning and overflow remediation analysis designs in an easy-to-use environment. You can design and operate sanitary or combined conveyance sewer systems by using built-in hydraulic and hydrology capabilities with a variety of dry- and wet-weather calculation methods. Better understand surface flood depth and velocity, flood hazard, and inundation times with the new user-friendly 1D/2D hydraulic analysis capability. Easy-to-use advanced engineering software, you can use SewerGEMS to analyze, design, and operate sanitary and combined sewer systems. Decrease decision risks by ensuring that the model uses the best available data, built-in hydraulic and hydrology capabilities, and a variety of wet weather calibration methods. Create what-if scenarios to gain a better understanding of wastewater systems to make smarter decisions and improve your response times. SCADA integration provides you with reliable model results, improves capacity and limits sewer overflows, which ultimately enable you to comply with sewer regulations set by regulatory agencies. 10901020	Bentley Structural WorkSuite (Analysis and Design Software) - is a bundle of Bentley’s most popular structural applications in a single cost effective license. This cost-effective bundle of structural analysis applications includes applications like RAM and STAAD. It helps engineers on tight budgets take advantage of comprehensive workflows to take a project from concept through completion. It includes the following: 1. STAAD.Pro, Advanced 2. STAAD Advanced Concrete Design 3. STAAD Foundation Advanced 4. RAM Structural System 5. RAM Concept with RAM Concept Post Tension 6. RAM Elements 7. RAM Connection 8. 50213030	Smart streetlight-ready LED Luminaire This shall be the minimum specification for the LED Luminaire. Above the minimum specification shall be accepted but to no additional cost to the City Government, LED luminaires should be SMART-Streetlight ready. A. Physical Characteristics I. Heat Sink: Extruded Aluminum alloy material with an anodizing finish in light gray color; II. Dimension: Length not more than 600mm, width not more than 350mm, and height not more than 150mm; III. Modularity: LED arrays, drivers, surge protection devices, and controllers should be modularly replaceable, without the need to dismantle other components; IV. Boom angle adjustable design: at least 0 – 90 degrees to suit the lamp post with different boom angle and the different width of roads; V. Weight: Maximum of 7 kilograms; VI. Ingress Protection: IP66 or higher for housing and all individual system components; VII. Mechanical Impact Protection: IK08 or equivalent to 5 joule (drop of 1.7 kilogram object from 29.5 cm height); VIII. Lens Cover: High transmittance rate Optical PC Lens cover with Anti-UV material; IX. Shape: Generally circular / elliptical / rectangular in configuration B. Electrical Characteristics I. Safety: Luminaire complies with the latest edition of the Philippine Electrical Code (PEC); II. Wire Type: THHN (copper stranded) using terminal blocks for connections; III. Wire Electrical Insulation: Complies with PEC class 1; IV. Grounding: PEC compliant; V. Operating Voltage: 230 volts AC, 60 Hz with fluctuation tolerance of ±10%; VI. Operating Current: Maximum 700 mA; VII. System Power: Not more than 75 watts; VIII. Surge Protection Standard: EN61547 / IEC61000-4-5, both positive and negative polarities are applied 1KV to the input AC power port; IX. Surge Protection Function: Series connection type with the indication of end-of-life status; X. Total Harmonic Distortion: ≤ 15%; XI. Power Factor: ≥ 0.95 XII. Maximum Operating Temperature (Ambient): 50°C; XII. Maximum Operating Temperature (Ambient): 50°C; XIII. Dimmable Power Supply / Driver: The driver shall enable 0-10V DC / PWM interface dimming control to perform Dim requirement such as 80%, 60%, 40%, 20% of full lumen output. It shall also have a programmable feature to allow pre-programming of variable dimming light levels. XIII. C. LED Performance and Photometry I. Minimum Luminous Efficacy: not less than 110 lumens/watt; II. Correlated Color Temperature (CCT): 5000K – 6000K; III. Minimum Color Rendering Index (CRI) not less than 70; IV. Lumen maintenance of LED source after 6,000 hours of operation: ≥ 96% of original light output or ≥ 96% lumen maintenance; V. Minimum operating life of luminaire before the Lamp Lumen Depreciation (LDD) reaches 70% of its initial value: LM80 report indicates L70 over 50,000 hours; VI. Road Luminance: (75W) Luminance average Eavg 20 Lux & 0.4 uniformity ratio minimum allowed (Minimum/Average) or Emin/Eavg) and Minimum Emax 30 Lux above under lamp for streetlighting post with the following specifications: mounting height of 8 mts, overhang of 1.5 mts, boom angle of 10 degrees, boom length of 2.0 mts, single row pole arrangement, pole distance of 25 mts, and road width of 8.0 mts. VII. Lumen Output: not less than 8,250 lumens VIII. Photometric Distribution IES Type I Short. The LED luminaire should be Smart Streetlight – ready (with NEMA socket for 7 Terminals and cover, with dimmable driver), which shall be subject for Field Testing.
