- 1.1 The R.A. 9184 and its implementing rules and regulations shall govern the conduct of bidding and award of contract for this project.

II. RATIONALE AND BACKGROUND

The Quezon City Government under the present administration seeks to acquire an effective, efficient and up-graded security services for the purpose of safeguarding its premises, properties, acquired/recovered properties/assets, equipments, employees and its Clients from and/or against theft, pilferage, burglary, arson, vandalism, trespass and other unlawful acts. The City General Services Department (CGSD) is mandated under Article 20, Sec. 490 paragraph b(v) of R.A. 7160, otherwise known as the Local Government Code of 1991 to "Maintain and Supervise Janitorial, Security, Landscaping and other related services in all local government public buildings and other real property, whether owned or leased by the local government unit".

In view of the importance in the administration of the City's properties relative to their acquisition, custody, storage, delivery, utilization, maintenance and disposal as well as the security of the City's employees and clientele, the hiring of private security is deemed imperative to ensure their security and protection from unwarranted damages, destructions and/or losses.

The outsourcing of the security services for the City is cost-efficient and effective and more advantageous to the City than maintaining it in-house with plantilla and/or job contract positions for the following reasons:

ECONOMY: While the City Government has to insure, provide overtime, night differential and hazard pay for regular plantilla employees, the security agency shall provide all necessary security equipment such as radios, CCTV's, service vehicles, firearms, batons, maintenance and licensing, training of employees/security guards, elbow manpower, and losses/damage and salary wage cost/increases, bonuses, security guard's insurance, which shall be provided in the service contract.

EFFECTIVENESS AND EFFICIENCY: The familiarity and friendship between the security guards and employees will be avoided due to regular reassignment/re-shuffle of security guards from one post to another. Thus, biases, paternalism and security breaches will be prevented. Immediate removal in case of unsatisfactory performance of the employee can hardly be done on employees with regular plantilla positions on the basis of the observane of due process.

Moreover, one hundred percent (100%) posting is assured due to availability of relievers at all times and there is a provision for the twenty percent (20%) elbow room of the total number of Private Security Professionals without additional cost to the City Government that will be provided in cases of emergency. Also, mobility and efficiency of the security force will be maintained because of the required age bracket in the service contract.

While the City Government have to bear the losses for items not covered by insurance and surety bonds, the Private Security Agency shall assume full responsibility for any loss or damage to properties covered by the service contract, except losses or damages caused by fortuitous event or Force Majeure.

The capability of each Private Security Agency, based on the eligibility requirements and technical and financial proposals, will be verified and/or validated. This includes the validation of its legal documents and the verification of its technical requirements to determine the legality of its existence and its capabability to responsive to the needs of the City Government.
